

High Quality XR over 5G

Jonas Ericsson, Director, Ericsson CTO Office

Ericsson Inc.

The presentation will provide a brief introduction to 5G and Ericsson. Focus of the presentation will be how 5G can enable VR use cases like ICE.IDO on commercial HMDs. Enabled by 5G cutting the cord to the HMD and providing connectivity to many HMD and tablet users at the same time and location. Device availability will be key to support the rollout, Initial deployments are planned for 5G private networks with a roadmap to support public 5G network deployments.
